

Independence My Ass

Independence Day -- America's founding documents are a FRAUD or farce at best.

Now help me, an Australian, understand what all you doodle dreamboats are really celebrating on July 4. Independence from what? America is more enslaved today by the same mercantile and banking interests than at any other time in its short history. The only thing that has changed is that ruling corporate and banking interests have now set up shop in America and call themselves American, notwithstanding that the largest private banking concerns are majority Jewish at the top.

July 4 celebrations are ludicrous as more Americans are enslaved today than ever before. Independence day my tanned Aussie arse!
