

The Reptilians

by liz Friday, Jul 27 2018, 8:26am

international / poetry / post

David Icke, genius, but it's all relative

i write this as one of many
reptiles inhabiting a human body
to dupe the schizophrenics of this world

u see, the truth of the matter is that i'm using
my projectile tongue to tap out this piece

i also possess a projectile dick
tho it doesn't have the range of my tongue,
which is 6 feet, matching my height.
my dick only has a range of 3 feet making it useless
for long range typing, nevertheless, it comes in handy
for other ventures, none of which would interest humans

now if David Icke hadn't let the snake out of the bag
we would have completely taken over by now,
somehow, un-medicated, he was able to see our real image
while we performed as world leaders,
and don't for a minute doubt it, tho Trump is actually
human, reptiles could never be so stupid. yet he fulfills
numerous tasks unconsciously which would have taken us
months, perhaps years to realise

so from our pov he's fine, our agenda is no different from that
of the U.S. Deep State tho i'd rather not involve myself in debate as
to whether
the denizens of the Deep State are reptilian or not, tho 'deep'
should supply
a reasonable hint for various psychiatric types.
these people know what they are seeing and hearing is real

somehow they are able to tune into our conversations,
and repeat them to their doctors, which fortunately
for us results in increased medications to the point where turnips
are more loquacious

but enough of this, i must report back to David for another
revitalising
charge of his paranoid schizophrenic delusions

like God, i exist only as i am created and re-created by the special
people

Home alone
