

Captured: The Overt War on the People

by jenny *Monday, Aug 27 2018, 12:21am*

international / prose / post

Ever since the elite ruling milieu took complete control of Washington during the Clinton-Bush presidencies, a silent, that is media uncovered, WAR against the people has been raging.

Ruling elites have always known that their nefarious plans and strategies for complete control would be exposed, 9/11 being the latest; they have to date been unable to control that situation/consequence as press freedom has ensured coverage of their nefarious activities. So, unable to prevent their eventual compromise they have shifted their attack on the one thing that could destroy them, the masses, and so a war has been raging against the people of the world, in order to prevent any actions against global criminal elites.

The first strategy developed in the 80's was debt enslavement. Easy credit was offered by banking sectors that jointly agreed to enslave by economic means, the freedom and social mobility of the masses was severely reduced as a result. Of course along with debt enslavement came rocketing price rises and depressed wage growth to force the masses into debts which they had no hope of recovering from. The sub-prime housing crisis was only one major result of this strategy and we should all note that responsible parties, the banks and financial lenders, avoided prosecution and jail for their overt financial crimes, as of course, they had already ensured they had Washington and the courts in their pockets.

The 'war on terror' now morphed into other pretextual wars, was and remains the excuse utilised to erode the PUBLIC'S 'inalienable' rights and civil liberties to the bone while of course implementing a police state to ward off any resistance; 'lockdowns' of major cities are now common. It should be noted that no effect whatsoever has been felt by real terrorist groups, which have proliferated during this period BUT a HUGE oppressive effect on the masses has occurred, and I should emphasise that this was no accident as the public was and remains the real target due to its potential threat to all ruling elite interests -- in other words democracy is DEAD and a growing totalitarian police state is replacing it at speed, again it is the public that is feared most of all by elites, as history has verified time and again.

Today with the assistance of Trump, dutifully ranting "fake news" continually, the last avenue for public dissent and freedom of speech is under direct attack by ruling elites, particularly from their media arms that have quickly taken it upon themselves to CENSOR anyone they choose under the pretext of 'fake news,' in which THEIR mass media specialises, a sad irony indeed.

Now, if we combine these orchestrated occurrences together they easily spell a war on the people, not terrorism or any other external 'threat' waged by those mass murdering criminals which have hijacked the nation and now hold it tightly in their grip.

These strategies were of course implemented incrementally, the so-called 'slow boiled frog' method and on each repressive occasion elites watched intently for a reaction; and as no reaction from the public occurred each new stage of repression/oppression was implemented and would continue, until complete control/CAPTURE of the masses has been achieved, which is just around the corner today

due to the public's inability to understand what is actually occurring.

Elites view and fear the PUBLIC most not any external threat, which they are easily able to deal with via their military arm; in other words, ruling shadow elites view the masses/public as the REAL enemy as their clearly repressive policies indicate. It is the public that has lost and suffered most since the obvious false flag of 9/11, though the(ir) mass media would intentionally indicate otherwise.

So there you have it PEOPLE, due to YOUR lack of social awareness, RESISTANCE when required and continuing economic slavery, you have earned your future, unenviable 'reward;' criminal elites have all but completely contained YOU!

You can therefore kiss what is left of your freedom GOODBYE, as now you are clearly incapable of any resistance! Though I could be proven wrong, but I doubt it based on previous public behaviour. So learn to enjoy your shit sandwiches and containment/enslavement, as due to your inaction when ACTION was required, you have earned your current status.

Good luck dreamboats, as you'll need it. Transparent to analysts, elite tactics and strategies have succeeded, much to THEIR relief and joy.
