"Based on the work of Architects & Engineers for 9/11 Truth led by Richard Gage, first responder and pilots organizations, books by David Ray Griffin and others, and eyewitness testimony, the Lawyers' Committee for 9/11 Inquiry has presented enough hard facts to the US Attorney for the Southern District of New York to force his compliance with the provisions of federal law that require the convening of a federal grand jury to investigate for the first time the attacks of September 11, 2001."

All credit goes to Richard Gage and his team of experts for their unrelenting persistence in pursuing the truth of the, now commonly known, false flag criminal attack of 9/11. To say the government is faced with monumental problems regarding the official cover-up is putting it mildly and therein could be the course to criminal proceedings and massive exposure of the criminal forces that have hijacked American democracy. This is no small achievement as the government story is clearly a croc of selective and dismissive contrived stories producing a huge fiction.

The government would now be faced with the many KNOWN facts that it purposely disregarded regarding the 9/11 attacks. The group pursuing the truth are mostly all experts and professionals in their respective fields and would not stand for the usual crap that the government disseminated regarding the attacks. This investigation has the potential to truly shatter the power of criminal elites involved in this REAL conspiracy to launch invasive 'terror' wars of resource theft and strategic international maneuvering, which today have proven to be huge failures, leaving millions of innocent victims dead and maimed, and tens of millions more displaced.

Truly, the 9/11 false flag was/is the crime of the century and the government would, if it tried its usual tricks to dismiss this case as it did with the JFK inquiry/cover-up, condemn itself in the eyes of the nation and WORLD, though we can expect the attempt which is most likely to backfire, given that the population is very short on tolerating government bullshit these days.

So again, full credit goes to Richard Gage and his team and it is hoped that famous deniers such as Noam Chomsky, Chris Hedges, Julian Assange and many other 'notables,' eat crow for being the sell-outs that they are -- the hard evidence of a demolition is overwhelming. And best of British luck to the criminals behind and in the American government and halls of power -- indeed, we may see real democracy in the United States after all. This case is well worth the attention it is likely to grab,

much to the consternation of government and other foreign (Mossad and the Saudis) GUILTY parties.
