

It is one thing that the CRINGING American People Tolerate Criminal Government ...

It is quite another when a CLEARLY lying, criminal government pursues international citizens without legal justification.

Indeed, the proven CRIMINAL, unrepresentative, ROGUE American government, is a major problem for the American people; however, if that government interferes or in any way intrudes on the freedom of INTERNATIONAL CITIZENS it is a case of extreme illegality regardless of groundless and contrived charges which should have no legal reach outside the USA, as every citizen of an independent sovereign State is protected by numerous laws, local and international.

The Assange case highlights for the WORLD to see, a rogue state in pursuit of an Australian citizen that has exposed its crimes and intrigues to the world, and for that SERVICE, a criminal State attempts to crucify the revelator, Julian Assange - what is wrong with this picture? EVERYTHING!

Firstly, we have over-reach that has never before been seen by the modern world.

Secondly we have clear evidence of the criminal complicity of Ecuador, the UK and Australia in surrendering Assange to a clearly rogue and criminal state - in fact the US administration is LYING in order to create another war with Iran as I write, notwithstanding the clear admission (evidence) of criminal activity from its past and present officials; psychopath Hillary Clinton admitted to the world that the USA was responsible for the murder of Gaddafi, "we came, we saw, he died." And prior to that, Sec of State Albright considered it "worth it," when questioned on the deaths of over 500,000 innocent children which resulted from enforced, by the USA, embargoes on medical supplies and other supplies to Iraq. Now if we add the 'Gulf of Tonkin incident,' the arranged DEADLY attack by Israel on an American ship, the USS Liberty, fake WMD, in order to justify an illegal attack on Iraq and all the other attempted and successful illegal coups in Venezuela, Ukraine, Yugoslavia, Syria - it becomes impossible NOT to see the REALITY that America is the world's leading civilian killing criminal terrorist State - PURE AND SIMPLE.

And yet the citizens of the WORLD fail to act in accordance with their inalienable RIGHTS and international LAW to apprehend the culpable and contain this mass murdering for profit, State cabal!

However, the WORLD has one last chance to remedy the problem and put an end to the actions of rogue states everywhere, and that is to haul American criminals before international courts created for precisely these offences against humanity and hold them ALL ACCOUNTABLE.

Now wouldn't those cases be a clear and NECESSARY action in restoring JUSTICE and PEACE to the world?

America and ALL its partners in crime, there are too many to list here, but particularly NATO members, the UK, lackey Australia, Israel and Saudi Arabia, to name the worst offenders, would be

forced to defend their KNOWN criminal actions, which continue because the WORLD fails to act, and if the world does nothing then clearly freedom and democracy would be lost forever, as the digital mechanisms for imposing totalitarian states in the west are already in place.

The case is NOT about Assange, it has a far broader scope as it involves the loss of international freedom and the imposition of draconian laws legislated by bought corrupt politicians for criminal elite interests. And once these criminals gain complete power, if we fail to act now, they will never let it go, as their continued survival depends on the complacency of citizens.

Supporting Assange in fact is maintaining freedom everywhere. And if we don't do something now, at this very late stage to prevent criminals establishing totalitarian, police state rule then as is OBVIOUS there will be hell to pay, your decision now will affect the future of the world and I do NOT exaggerate. Think of your kids, we must ensure that rogue States are held accountable for their known crimes! And doing that is quite simple; we force our current FAKE and bought representatives to act in the interests of law, order and peace by popular DEMAND, as no social force is greater than the unified will of the PEOPLE, fact! So are we to be slaves or Free, inaction is NOT an option today?
