Future Resource Wars

The title is indeed a good question as the masters of war NEVER do the fighting and dying, WE do that, convinced by LIES, orchestrated propaganda and pretexts, designed to present a profitable target as a threat. I refer all readers to the lyrics of Bob Dylan's, "[Masters of War](#)" and General Smedley Butler's "[War is a Racket](#)" and this [poem](#) if in any doubt regarding who the nefarious interests are that provoke mass murdering illegal wars for the PROFIT of the few.

The video below is one of the latest presentations of the Truth of unnecessary wars though people throughout the ages have warned populations to resist these CRIMINAL mass murdering forces. When will we ever learn the simple reality that WARS are contrived by the sickest and darkest humans alive? We need only force them to do the fighting and dying to prevent future wars as these supreme cowards would never risk their own lives and assets:

Have we finally LEARNED?

[Share around.]
