Russia Officially Enters Southwest Syria Offensive Despite US Warnings

Orwell's new world of the inverted and absurd is alive and well TODAY. Russia has entered the Syrian war LEGALLY to defend a sovereign ally while America continues to ILLEGALLY occupy the country and engage in direct military action against sovereign state Syria and also continues to engage in indirect action by supporting Jihadist/extremist rebel forces in its pay. Furthermore, the criminal state that flouts all international laws and conventions, AMERICA, has issued a "stern warning" to Russia and the government of sovereign Syria NOT to interfere with its CRIMINAL activities of attempting to appropriate the precious oil and gas resources of SYRIA -- how's that for a classic Orwellian inversion, crime is right and legality/law is wrong?

However, the Orwellian mass media/propaganda apparatus of today continues to dupe the western public insisting that the grossly illegal American occupation and criminal military actions are justified; WELL, NOT according to international LAW and Conventions, which the USA helped draft after WWII.

The extent to which this OVERT Orwellian inversion has progressed today staggers the imagination of all independent thinkers grounded in REALITY, in stark contrast to the dreams of those that maintain their connection to the mass media drip-feed and its easily exposed BLATANT LIES.

Now consider that news of Russia's advance comes from a Middle Eastern paper and how little is accurately covered by the western Orwellian mass media/propaganda apparatus.

Article from Al-Masdar follows:

BEIRUT, LEBANON (12:20 A.M.) - The Russian military officially entered the southwest Syria offensive this evening, a source told Al-Masdar from the Dara'a Governorate.

The Russian Aerospace Forces unleashed a massive assault over northeastern Dara'a, tonight, targeting several areas controlled by the jihadist rebels.

According to a military source in the government stronghold of Izra'a, the Russian Aerospace Forces launched over 20 airstrikes across northeastern Dara'a tonight.

The source told Al-Masdar that the Russian Aerospace Forces specifically launched airstrikes over the towns of Masikah, Aeeb, and Busra Al-Harir.

They added that the majority of the airstrikes were launched on the jihadist stronghold of Busra Al-Harir, which is located directly east of Izra'a.

This attack by the Russian Aerospace Forces comes just 48 hours after the U.S. State Department issued a stern warning to both the Russian and Syrian governments about

escalating their offensive in southwest Syria.
