## Blue

> snow falls far away so far that it's hardly consequential to mention it tho the snow falls never the less

blue forest trees refuse to burn in raging forest fires while surrounding trees screaming are consumed by the flames

what secret does blue possess? the sky and sea are blue as are mountains in the distance which jutting peaks lick the snow until wet but the real signifier is this blue planet which we call home

the blue keeps us all safe, yet no one guards its deep blue hue
