

## **Total Destruction of Europe Will Be It's Payoff for Being an American Vassal: Princeton Scientists**

by Russia Insider via cyd - ICH *Saturday, Nov 9 2019, 10:11pm*

international / prose / post

Top Russian Talk Show Rips Princeton University Over Callous Fantasizing About Nuking Russia. Nevertheless, this is all bluff and bluster according to Washington war hawk whackos. Indeed, they have a point when considering coward Putin but the Russian military is another story and Putin's life in the event of war is not worth a plugged nickle.

Transcript:

- We're continuing our talk about the most important matters.

A lyrical digression - American scientists at Princeton University have estimated how many would die in a full-scale nuclear conflict between Russia and the US. The number is not comforting - almost 60 million people killed. If counting the wounded - 96 million people. Why would they conduct such research? We don't understand, but this footage is impressive, and the results are nightmarish.

"Nuclear warning shots. Russia launches a nuclear warning shot from a base near Kaliningrad. NATO retaliates with a single tactical nuclear air strike. The tactical plan. Russia sends 300 nuclear warheads via aircraft and short- and intermediate-range missiles to hit NATO bases. NATO responds with 180 nuclear warheads. The number of immediate casualties: 2.6 million over three hours. The counterforce plan.

With Europe destroyed, NATO launches a strategic strike of 600 warheads from US land and submarine-based missiles aimed at Russian nuclear forces. Russia launches a retaliatory strike. The number of immediate casualties: 3.4 million over 45 minutes.

The countervalue plan. Russia and NATO each target the other's 30 most populated cities, using 5-10 warheads on each city. The number of immediate casualties: 85.3 million over 45 minutes. The number of immediate casualties - 91.5 million, including 34.1 million fatalities and 57.4 million injuries.
