

Putin Exposes US Protection Racket

by staff report via jess - ICH *Saturday, Nov 23 2019, 9:06pm*

international / prose / post

The USA is currently engaged in extorting protection money from its allies in NATO, South Korea, Japan and elsewhere. The gangster line is very simple, 'we are protecting you so you must pay for that protection!' Indeed, protecting us from WHAT? China and Russia have no military expansionist ambitions plain to see today, however, one nation stands out as a mass murdering, violent expansionist nation, guess? Yes, the USA, simply check its heinous murdering track record over the past few decades to confirm. So the question begs, which nation does the world need to protect itself from? Yes, rogue, gangster State, America.

And in the true tradition of organised crime and protection rackets, if other nations do not pay up or comply with Washington's demands, the USA then arranges (pays) for coups against legitimate leaders/governments, complete with military takeovers, proxy wars and the destruction of non-compliant nations, as has been historically recorded/PROVEN in recent history, remember, that Iraq was a US ally when it suited America as was Libya with NATO. Talk about gangster tactics and back stabbing!

Clearly, the OBVIOUS threat to world peace and the ravages inflicted on weaker nations by ROGUE, LAW FLOUTING avaricious interests is the home of international organised crime, WASHINGTON! So America, who do you think you are kidding and how long do you think the world would tolerate your obvious intimidation, extortion and exploitation? Not for much longer, be assured; you are as transparent as wet toilet paper. Good luck with your overt criminal pursuits, as you NOW face PARIAH status and a ruined economy -- you can't keep printing essentially worthless paper dollars to fuel your corruption bribes and illegal invasive wars, forever, and you know it.
