That is the reality for America with 'engineer' Trump at the controls.

There is no sane reasoning to any of his actions or policies and it's a blight on the mass media to attempt any sane analysis -- there is none, only Trump's ego and his profound ignorance of politics and the world.

The harm that one incompetent president is doing to the country is almost beyond measure, previous ignorant buffoon presidents were at least on a leash and had sense enough to take advice from experts but not out of control Trump.

Each day he remains in office is another disastrous day for America -- that is the reality the mass media is unable to face.
